820th RED HORSE puts out fire

Photo by Tech. Sgt. Jonathan Doti

Airman 1st Class Jesse Jacobson and Airman Jason Lilley, 820th RED HORSE, resupply the water truck from St. George's, Grenada, Fire Station. Both RED HORSE members helped control the fire with the water truck before local fire fighters arrived.

By Maj. Donna Nicholas
JTF Midas/Public Affairs

Members of Joint Task Force Midas were called out to assist with a three-alarm fire in downtown St. George, Grenada, July 15.

The call came in around 8:30 p.m., from local businessmen frantic to get water trucks to the scene, since the fire was blazing out of control and there are no fire hydrants for fire suppression. The fire ignited in a lumber and textiles store, and threatened to burn down the entire business district.

Tech. Sgt. George McFadden, heavy equipment operator with the 820th RED HORSE Squadron, assembled a crew made-up of fellow heavy equipment operators, Airman 1st. Class Jesse Jacobson and Airman Jason Lilley and vehicle maintenance apprentice, Senior Airman Jeremiah Johnson, all with the 820th RH. Marine security from the 8th Engineer Support Battalion, Camp Lejeune, N.C., Cpl. James Archuleta and Cpl. Mario Rivas,

also went to the scene and offered their assistance.

The team arrived to absolute chaos and confusion, with billowing smoke and a mob scene. "There wasn't a fire chief per se, and we had 20 different people trying to tell us where to go and what to do. I was very proud of the way the guys stayed level-headed and remained calm," said Sgt. McFadden.

Anyone who has driven the streets of Carnage, Grenada, can relate to the challenge and high anxiety they pose under normal conditions. The situation was amplified by maneuvering a 26,000-pound water tanker through the streets, heading for an unknown situation, with people screaming and waving directions and commands all along the way.

"It was pretty intense at first," Airman Jacobson said. "I had never driven the water truck in that area before, and there were some very hairy moments. Those streets weren't designed for a truck this big, and if it had not been an emergency, we never would have driven it there."

It was this panicked confusion in the streets that made the Air Force members glad the Marine security members came along to help out. "There wasn't any blatant aggression, but there was a constant threat of looting. I think just having us there, watching out for the guys who were concentrating on the fire suppression, was helpful," Cpl. Archuleta said. They also helped maneuver the 6-inch, 25-foot hose that pumped water into the fire trucks.

Once their initial load of water was depleted on the fire, they had to go to the closest water source--the ocean-- and keep the supply flowing until the main fire engines could get to the scene.

The process was made somewhat simpler since JTF Midas personnel had been getting water from the fire station since arriving and knew the people and the system to ensure a quick turnaround. "I'm very happy with the way everyone performed," Sgt. McFadden said. "Especially when we were there for eight hours, fighting smoke and the crowds...only to be called back thirty minutes after we had all gone to bed, exhausted from the initial response. The flames resumed and the fire once again threatened to engulf the entire area.

"That was when I admired the resolve of these guys the most," Sgt. McFadden said. "They just got up, put on their uniforms, and went on back to helping out." All agreed, even though the fire was a tragedy, the experience was one they learned from and will always remember. "We were glad we could respond to the call, and I know we definitely helped lessen the damage," Sgt. McFadden said.

Members of the 820th RED HORSE Squadron are constructing a school in Frequente, Grenada, as part of a military exercise that began in May. In addition to the school, the squadron is building a community center in Mont Tout, Grenada and Marines from Camp Lejeune, are constructing a barracks for the Royal Grenada Police Force, Special Services Unit. The team is expected to complete construction on the projects by the first week of August.

Aguilar was promoted under the stripes for exceptional performers program. Sgt. Aguilar is assistant NCO-in-charge, aerospace ground equipment, 414th Combat Training Squadron.

DOD announces harassment action plan

WASHINGTON (AFPN) — The Department of Defense announced a 13-point action plan designed to eliminate all forms of harassment during a Pentagon briefing July 21.

The plan was developed by a working group comprising senior civilian and military officials from each service, established at the direction of Secretary of Defense William S. Cohen and chaired by Undersecretary of the Air Force Carol DiBattiste.

"Treatment of all individuals with dignity and respect is essential to good order and discipline," Ms. DiBattiste said. "Mistreatment, harassment and inappropriate comments or gestures undermine this principle and have no place in our armed forces."

"Commanders and leaders must develop and maintain a climate that fosters unit cohesion, esprit de corps and mutual respect for all members of the command or organization," she said.

According to the undersecretary, DOD will be issuing a single department-wide directive making it clear that mistreatment, harassment and inappropriate comments or gestures, including those based on sexual orientation, are not acceptable. The directive also mandates that commanders and leaders will

be held accountable for failure to enforce this anti-harassment policy.

"Secretary Cohen approved the working group's action plan and has directed that it be forwarded to the services for implementation," Undersecretary of Defense for Personnel and Readiness Bernard Rostker said.

The 13-points included in the action plan are:

- The DOD should adopt a n overarching principle regarding harassment.

- The DOD should issue a single department-wide directive.

- The services shall ensure feedback or reporting mechanisms are in place to measure homosexual conduct policy training and anti-harassment training effectiveness in the following three areas: knowledge, behavior and climate.

- The services shall review all homosexual conduct policy training and anti-harassment training programs to ensure they address the elements and intent of the DOD

overarching principle and implementing directive.

- The services shall review homosexual conduct policy training and anti-harassment training programs annually.

- The services shall review all avenues for reporting mistreatment,

harassment and inappropriate comments or gestures to ensure they facilitate effective leadership response.

- The services shall ensure homosexual

conduct policy training and anti-harassment training programs address all avenues to report mistreatment, harassment and inappropriate comments or gestures and ensure persons receiving reports of mistreatment, harassment and inappropriate comments or gestures know how to handle these reports.

- The services shall ensure that directives, guidance and training clearly explain the application of the "don't ask, don't tell," policy in the context of receiving and reporting

complaints of mistreatment, harassment and inappropriate comments or gestures.

- The services shall ensure that commanders and leaders take appropriate action against anyone who engages in mistreatment, harassment and inappropriate comments or gestures.

- The services shall ensure that commanders and leaders take appropriate action against anyone who condones or ignores mistreatment, harassment and inappropriate comments or gestures.

- The services shall examine homosexual conduct policy training and anti-harassment training programs to ensure they provide tailored training on enforcement mechanisms.

- The services shall ensure inspection programs assess adherence to the DOD overarching principle and implementing directive through measurement of knowledge, behavior and climate.

- The services shall determine the extent to which homosexual conduct policy training and anti-harassment training programs, and the implementation of this action plan, are effective in addressing mistreatment, harassment and inappropriate comments or gestures.

Nellis sexual awareness training

- Two-hour commander directed session reviews DOD and local sexual harassment policies.

- Results of a 10-question survey are sent to commanders for action.

Chemical warfare training saves lives

Left, Airman 1st. Class Marco Trejo, 57th Equipment Maintenance Squadron, inspects his gas mask for defects. Above, Tech Sgt. Al Guerin, 99th Civil Engineer Squadron, explains how to tighten a mask when it is on.

**By Tech. Sgt. Gayle Barajas
AWFC Public Affairs**

The possibility of chemical warfare is increasingly becoming a reality. Are you prepared?

Nuclear, Biological and Chemical Defense Training prepares military members and civilians for chemical/biological attacks.

"NBCD training is an annual requirement for all military people possessing an Air Force specialty code that is deployable and for emergency essential civilians deployable to chemical/biological threat areas," said Capt. Matt Hutchings, 99th Civil Engineer,

Readiness Flight commander.

The training is not only imperative, it's an Air Force requirement.

"This training (NBCD) is important for two reasons," said Master Sgt. Martin Janssen, 99th CE, Readiness Flight superintendent. "The first one is obvious, people need to be trained and ready. The second underlying reason deterrence."

"If an enemy feels they have nothing to gain through a chemical/biological attack because we are prepared to handle the situation and continue with our mission, they are less likely to do so," said Capt. Hutchings.

By maintaining a proactive

posture through training, equipping and exercising our forces for this type of warfare, we have already won the big battle because we can reduce the chances of its use, said Sgt. Janssen.

Training requirements of deployed troops have been addressed at all levels of command, including Air Combat Command's commander.

There is no such thing as 'just-in-time' training, according to Gen. John Jumper, ACC commander.

This is one of the many reasons 99th Civil Engineer readiness flight has gone to scheduled NBCD training classes which replaces the previous walk-in program.

The new scheduled training has prompted an increase in no-shows.

"In a year we are required to train more than 5,600 people," said Sgt. Janssen. "For the month of June we had the potential to train more than 470 people, but we had over 150 no-shows resulting in only training 300. At that rate, we end up 2,000 people short of our training requirements."

Individuals are responsible for getting to class on time and making sure they have the right equipment. Units can assist with decreasing the number of no-shows.

Unit training monitors play a key role in reducing no-shows by making sure people in their units know when they are scheduled for training, where the training is conducted and what equipment is required, said Capt. Hutchings.

"Five to seven months after receiving NBCD training, individuals are required to conduct on-the-job training in one of their wartime skills while in MOPP 4, and unit trainers need to make sure it is documented accordingly," said Sgt. Janssen.

NBCD training classes are normally Tuesdays at 6:30 a.m., 9 a.m. and noon in the readiness classroom building 10146 in area II.

Classes start on time and no one is permitted to attend if late. People must show up with the required equipment, which includes wear of the battle dress uniform and the complete ground crew chemical defense ensemble.

"The threat of chemical/biological attack is real," said Capt. Hutchings. "The nature of the business and the locations we deploy to make the possibility even more likely. Protect yourself by taking NBCD training seriously."

If you have questions, call Capt. Hutchings or Sgt. Janssen at 652-1820 or 652-1281.

Summer days make pool too hot

I am writing this because of a safety concern. It has to do with the temperature of the Olympic Pool for lap swimming. This is my 11th season of swimming at the Olympic Pool.

I greatly appreciate that we now have solar heating to extend the swimming on either end of summer months. However, this has also caused a problem. Someone is going to get thermally stressed while swimming in a pool which was 89 degrees Fahrenheit two days ago.

This problem also happened over a month ago, and I talked to a services squadron representative about it. He said he would see what he could do. The problem wasn't resolved. I sent an e-mail to the services squadron, but I never got a reply back.

I went TDY the previous two weeks and had hoped the problem was solved by turning off the solar heating. The ideal temperature for swimmers is 78 degrees Fahrenheit. If this is too low, maybe a

compromise could be reached such as 82 degrees. From my own personal experience swimming in the Olympic Pool this season, 84 degrees is about the most I can take.

As I understand it, the pool does not have the ability to turn off the solar heating. Lifeguards said this is the jurisdiction of the water shop in the 99th Civil Engineer Squadron. If there is an engineering reason that we can't turn the solar off, such as the solar heating apparatus getting too hot, then something needs to be remedied. I hate to think what the temperature will be in late July or August when the outside temperatures go over 110 degrees Fahrenheit.

In the past and without solar heating, the pool would get too hot by the end of one of these heat streaks. Your consideration in this matter is appreciated.

Thanks for your call and I must apologize for lack of proper feedback to your earlier questions. Consistent

with National Swimming Pool Foundation guidelines, we seek to keep water temperatures between 82 and 84 degrees Fahrenheit. This standard accommodates swimmers such as yourself, who exert themselves, and small children, as young as six-months old, taking swimming lessons. As you note, recent temperatures have averaged higher than desired; specifically, 85 to 86 degrees. The solar heating system has been turned off for some time to remain in an acceptable range.

We are doing what we can to ensure a pleasurable experience for all pool users. Continue to enjoy the pool. Like with any other type of exercise, if you feel you are over exerting yourself please reduce your pace and take the time to cool down.

Summer safety tip:

Drink plenty of fluids and, when possible, avoid strenuous activities during the hottest part of the day, noon to 5 p.m.

Korean War heroes shoot down 27 MiGs

Seen here in a 1950's photo, these fighter aces had just returned to Nellis from Korea to instruct pilot trainees in the art of downing MiGs. The Soviet-made MiG-15 was the F-86's primary opponent during the Korean War. These pilots shot down a total of 27 MiG-15s. From left to right, 1st Lt. Robert Moore, Capt. Robert Latshaw, Maj. William Whisner, Jr., Capt. Iven Kincheloe. Kneeling is Col. George Jones. Nellis is observing the 50th Anniversary of the Korean War.

Cycle vision: How many motorcycles have you seen today?

By Master Sgt. Howard Earl
**AWFC Ground Safety
Manager**

Motorcycle mishaps are on the rise throughout the Air Force. The predominate cause of these mishaps is motorists' failure to detect and recognize motorcycles in traffic.

To decrease the number of motorcycle crashes, it is imperative motorists increase their awareness, understanding, and respect for motorcyclists. This special attention starts with an awareness of motorcycles, an understanding of what to expect from them, and some knowledge of where most crashes are likely to occur.

The first step is to ask yourself: "How many motorcycles did I see today?" Then, look again to assure you have looked for motorcycles and automobiles.

This is what we call putting on your "cycle vision." Putting on your cycle vision is a mental attitude and awareness that motorcycles are everywhere.

Motorists that put on their cycle vision look for, understand and respect motorcycles sharing the roadway. Here are a few suggestions to apply:

Actively look for motorcycles anytime you are on the road. Expect to see motorcycles, not just another car. Do not trust your mirrors because motorcycles can be hidden in your blind spot. Instead, turn and look over your shoulder.

Keep motorcyclists in your mind and think from their point of view. Motorists tend to look for other cars, not motorcycles. Understanding the challenges faced by motorcyclists can help motorists see

from another point of view while driving. Drivers can then anticipate the riders' moves and perhaps help prevent a crash from occurring.

Give the motorcycle the same space and respect that you would give other vehicles. A motorcycle occupies 4 feet of a 12-foot lane in traffic. Do not forget they use the whole lane of traffic, even though it is not all at one time. Always give them a full lane, and remember not to follow too closely.

Motorcycles don't have protective exteriors like cars; therefore, they are more vulnerable to a variety of elements. Motorcyclists are more affected by bad weather such as rain, high winds and ice. Even with the proper clothing and helmets, motorcyclists are at a higher risk of injury should they be involved in a

Graphic image by Staff Sgt. Russell Cooley and Staff Sgt. Jim Bianchi

2nd Lt. Alan Orlikoski, 99th Communication Squadron, demonstrates safe riding procedures while operating his motorcycle.

crash.

Be courteous. The most frequent cause of multi-vehicle crashes is a motorist turning left in front of an oncoming motorcycle. Anywhere two vehicles' paths can cross creates a danger point for both motorcycles and automobiles.

Drivers who put on their "cycle vision" are consciously aware of motorcycles and recognize potential crash areas. Each time you drive your automobile, put on your "cycle vision" and ask yourself: "How many motorcycles did I see today?"

Unless otherwise indicated, all show times are 7 p.m. with Saturday matinees at 1 p.m. To be put on the email mailing list, send your request to angel1m@lvcn.com, or call 652-5020 for more information.

15th Reconnaissance Squadron's primary mission is to provide theater commanders with aerial reconnaissance, surveillance and target acquisition flying the RQ-1A Predator.

Youth chorale performs at Chapel

By 2nd Lt. Ray Barrett
99th Air Base Wing

The American Christian Youth Chorale rolled into Nellis by bus July 17 to perform at the Chapel. This was the 17th day of their 30-day cross-country "His Truth Is Marching On Tour."

Their outstanding performance consisted of two parts: *Songs of Spiritual Praise* and *A Tribute to America*. The large crowd attending the performance showed their appreciation by giving multiple rounds of applause and two standing ovations.

The American Christian Youth Chorale is a national, interdenominational summer music ministry for high school age singers, pianists and instrumentalists. It is based in Trenton, N. J. and led by Dr. Gregory and Mrs. Elizabeth Goida. Currently, the group consists of 33 young people between the ages of 15 and 18. They represent 18 different states and 13 different denominations. Each mem-

ber of the group was selected on the basis of videotaped auditions. Every year a new group is selected to tour and no member may serve more than one year with the chorale.

Prior to the July 17 evening performance, the Youth Chorale was treated to a dinner prepared by Chapel parishioners.

Many members of the Chapel community hosted different students following the concert event. Several of the students stated this was their first time on a military base.

The morning after their performance, the Youth Chorale reconvened at the chapel and loaded their bus to travel to the next stop of the tour, Flagstaff, Ariz.

But before leaving the base, the Youth Chorale was given a tour of the Nellis flight line, including a visit with the Thunderbirds.

Most of these young people had never seen military aircraft. Col. Skip Collins, 57th Logistics Group commander, and Maj. Charles Stutts, 99th Air Base Wing, led the tour.

Base championship playoffs begin tonight

By Staff Sgt. Benny Colley
99th Services Squadron

Intramural Softball Base Championship tournament begins tonight at Freedom Park.

Sixteen teams qualified to compete in the tournament. The top four seeds

are 99 SFS, 820 REDHORSE, 57 EMS -3, and 57 AGS/Eagle.

These four won their respective regular season division championships and earned the top berths for the tournament. Action continues all day Saturday and Sunday with the champion-

ship game scheduled for Sunday evening at 8:30. Games will be played on Fields 6 and 7.

The Sports and Fitness Center staff invites the entire base community to come out and cheer their team to victory.

First round schedule for today:

Field 6

- 6 p.m. 99 SFS vs USAR
- 7:10 p.m. 57 EMS-3 vs 99 CES-2
- 8:20 p.m. 820 REDHORSE vs USAFWS
- 9:30 p.m. 57 AGS/Eagles vs 57 CRS-1

Field 7

- 99 SUPS vs 57 EMS-1
- 99 COMM vs 57 AGS/Viper
- 99 Services vs 99 MDG
- 99 CES-1 vs 57 OSS

For a complete weekend schedule or for more details, call Staff Sgt. Colley at 652-6437

Nellis Bowling Center closing lanes

The Nellis Bowling Center closes its lanes Aug. 7 for installation of new pinsetters. The snack bar remains open Mondays through Fridays from 10:30 a.m. to 2 p.m. for lunch.

The 30-year-old equipment is being replaced with modern, state-of-the-art pinsetters at a cost of approximately \$300,000. These funds were generated from bowlers throughout the command. No taxpayer dollars were used.

The new pinsetters are designed to run faster and quieter, reduce stoppage and cause less ball damage. In addition, the equipment will be easier to repair and minimize down time.

The lanes are scheduled to reopen Aug. 21.

Nellis News

Editor's note: Submissions for print in the Bullseye are due by noon the Friday prior to the edition requested for print.

Warehouse inventory

The 57th Equipment Maintenance Squadron's Munitions Flight continues a closed 100 percent stockpile inventory through Monday. For more information, contact 652-1286.

Military Personnel Flight hours

Walk-in hours for Outbound, Retirements/Separations, Manning, Personnel Readiness and Retention are 7:30 to 10 a.m. and 1 to 3 p.m. It is recommended customers come in during walk-in hours. Customer Service, however, will assist people with emergencies. The Customer Service counter hours remain the same, 7:30 a.m. to 3:30 p.m. All other sections are open 7:30 a.m. to 4:30 p.m.

Elementary School anniversary

Lomie Heard Elementary School celebrates its 51st anniversary

Oct. 20 from 6 to 8 p.m. For more information, write Lomie Heard Elementary School, 42 Baer Dr., Las Vegas, N.V. 89110, or call 799-4921.

Chiefs' positions

The Air Force Personnel Center Chiefs' Group, in conjunction with United States Strategic Command, is seeking volunteers for the command chief master sergeant position at USSTRATCOM, Offutt Air Force Base, Neb., reporting no later than Sept. 30. Contact Customer Service at 652-9072/2-9459 for more information.

Golf tournament

The Sunrise Vista Golf Course is sponsoring an Air Force Ball Golf Tournament Aug. 18. It's a four person scramble with a 7:30 a.m. shotgun start. Cost is \$50 per person for military/Department of Defense employees and \$75 for civilian guests. Price includes fees, cart and lunch. Cash prizes are awarded for 1st through 3rd place. To register, call Master

Sgt. Marty Anderson by Tuesday at 652-2206 or e-mail marty.anderson@nellis.af.mil.

NCO Retraining program

Air Force officials have announced the start of the FY01 NCO Retraining Program effective immediately. About 1,200 staff sergeants, technical sergeants and master sergeants will be retrained from Air Force specialty code's with NCO overages to AFSC's with shortages. A list of retraining-out and retraining-in AFSC's is available at the Military Personnel Flight, unit orderly room's and on the web at www.afpc.randolph.af.mil. Contact Senior Airman Barnett at 652-9265 for complete details.

Museum closure

The U.S. Air Force Air Demonstration Squadron museum will be closed Aug. 15 through Aug. 21 for the team's mid-season break. No public tours will be conducted on Aug. 15 or Aug. 17. Normal hours, 8 a.m. to 4 p.m. Monday through Friday, resume Aug. 22.

Gasoline thieves face prosecution

Convenience store owners and service station operators are reporting an increase in theft of gas, known as "drive offs." This has become a common occurrence on and off base.

From January through July, Nellis experienced 58 drive offs totaling \$709.

Anyone on Nellis who is caught after failing to pay for gasoline will face prosecution.
